LS telcom AG and Siemens AG enter into solution partnership for Industrial 5G

Siemens AG and LS telcom AG have entered into a strategic partnership to jointly provide Siemens' private 5G wireless technology for a wide range of applications and cross-sector solutions. The aim of the cooperation is to provide industrial customers with a comprehensive and powerful offering for private 5G applications.

Siemens, a leading technology company, and LS telcom, a global market leader in radio communications, frequency management and radio monitoring, are combining their expertise to provide customers with a state-of-the-art 5G campus network infrastructure.

The private 5G infrastructure from Siemens enables users to independently operate a self-sufficient, highly efficient wireless infrastructure that also contributes to the optimization of business and production processes. Companies benefit from more efficient, cost-effective operations and sustainable process optimization. The partnership provides users of the private 5G solutions with a comprehensive range of services - from consulting on specific use cases, licensing, planning, and dimensioning to the complete implementation of the 5G network. This holistic approach ensures customized, future-proof 5G solutions that meet the growing requirements of the industry.

"We are very pleased to announce our partnership with Siemens to provide our customers with a 5G infrastructure developed and produced in Germany for network independent industrial applications. We greatly appreciate working with such an experienced and renowned partner as Siemens. We are convinced that this cooperation will offer our customers considerable added value and future-oriented solutions," emphasizes Roland Götz, Chief Operating Officer of LS telcom.

"With LS telcom, we have a very experienced partner in the field of private mobile networks at our side to offer our customers future-proof private 5G solutions. LS telcom brings extensive expertise to deliver real added value to industrial customers through consulting, services, and integration," explains Daniel Mai, Director Industrial Wireless Communication at Siemens.

About LS telcom

LS telcom is a leading global provider of technologies and consulting services for the efficient use of radio frequencies. Our focus is on optimizing spectrum management and usage to ensure interference-free, reliable, and secure radio services in all markets.

Our portfolio includes consulting and measurement services as well as integrated solutions for the planning, analysis, monitoring, and management of radio infrastructures. Our customers in over 100 countries include regulatory authorities, mobile, fixed and broadcasting network operators, ministries, public authorities, and security organizations as well as companies from the traffic, transport, utilities, and industrial sectors.

With subsidiaries and branches in Australia, Bosnia-Herzegovina, Germany, France, Great Britain, Canada, South Africa, Hungary, India, Lebanon, the USA and the United Arab Emirates as well as representative offices in Argentina and Oman, we have a global presence. The headquarters of LS telcom AG are in Lichtenau, Baden, Germany. LS telcom AG has been listed on the German Stock Exchange under ISIN DE 0005754402 since 2001. About Siemens

Siemens AG (Berlin and Munich) is a leading technology company with a focus on the fields of industry, infrastructure, mobility, and healthcare. The company's mission is to develop technology that improves everyday life, for everyone. By connecting the real world with the digital world, it enables customers to accelerate their digital and sustainable transformation. This makes factories more efficient, cities more livable and transportation more sustainable.

Siemens is the majority owner of the listed company Siemens Healthineers, a global leader in medical technology that is shaping the future of healthcare. In fiscal year 2023, which ended on September 30, 2023, the Siemens Group generated revenue of €74.9 billion and a profit after tax of €8.5 billion. As of September 30, 2023, the company employed around 305,000 people worldwide on a continuing basis. Further information can be found on the Internet at www.siemens.com.
